Mold detox like never before

Exceptionally pure, vigorous mycotoxin binder

Featuring:

- **G-PUR®** – A highly purified natural zeolite. G-PUR® uses the clinoptilolite form, characterized by a higher silica level for maximum binding of mycotoxins, aluminum and ammonia.
- **PureBind™ Humic Acid** – Exceedingly pure 70% humic acid (vs. standard 30%), featuring increased binding without common humic acid impurities.

Mycotoxin detox protocol

Step 1 _ Prepare & open detox pathways

Tri-Fortify® Liposomal Glutathione – Peer-reviewed, published, clinical research* confirms:

- **28% increase** in red blood cell glutathione levels
- **400% increase** in natural killer cell function
- **25% reduction** in lipid peroxidation

Step 2 _ Bind & expel

MycoPul® – Advanced mycotoxin binder promotes healthy removal of multiple mycotoxins, as well as fungus, metals, and ammonia.

Transfer Factor Enviro™ – Promotes a healthy immune response to mold.

Core Minerals™ – 12 minerals + vitamin D3 to support essential minerals lost during detox.

- **For all product sheets**, see p.3 - p.7
- **Global Multi-Systemic treatment plan in mold & mycotoxins**
  You can find the protocol at the end of this document

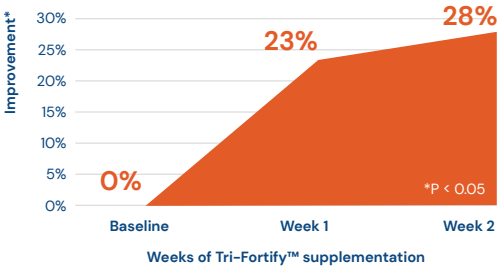
Tri-Fortify Watermelon® or Orange®

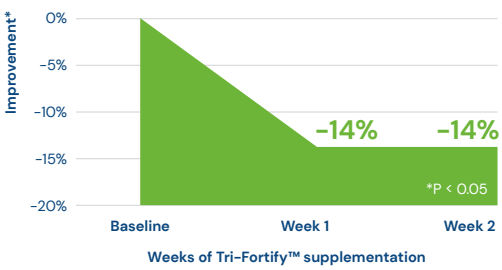
indication	Detoxification with glutathione in high bioavailable formulation, powerful antioxidant, Natural Killer Cell support	
dosage	1 teaspoon (1 pack) per day, away from food	
packaging	236 ml per tube or 20 packs per box	
composition (amount per 1 teaspoon)	Glutathione Liposomal Vitamin C	450 mg 50 mg

All information is exclusively aimed at and released to an audience of health care professionals.

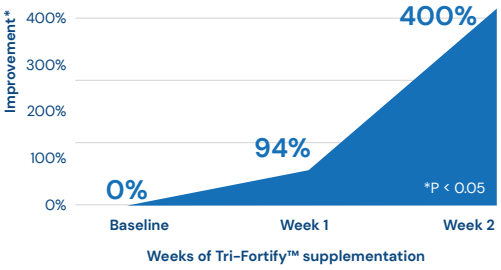
Glutathione levels
Increase in red blood cell levels (Erythrocytes)



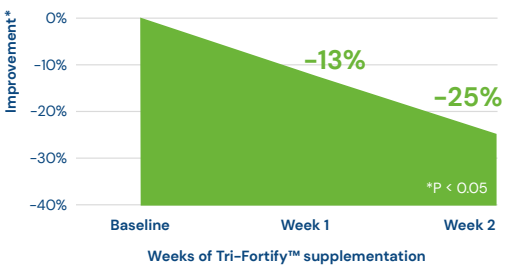
Oxidative stress markers
Oxidized / Reduced GSH



Immune function
Natural Killer Cell activity



Lipid Peroxidation
(Reduced Cellular Membrane Oxidation)



Published research : Sinha, R., Sinha, I., Calcagnotto, A., Trushin, N. Oral supplementation with liposomal glutathione elevates body stores of glutathione and markers of immune function. Eur J Clin Nutr. 2018 Jan;72(1):105-111.

MycoPul™

indication	MycoPul is a combination of several binders, targeted to eliminate mycotoxins (toxins produced by molds), heavy metals and environmental toxins. MycoPul includes a patented, purified and natural form of zeolite.	
dosage	1 caps per day 1 hour before or 2 hours after eating	
packaging	30 caps per container	
composition (amount per 1 cap)	Activated Charcoal Fulvic acid Black humate powder Zeolite Clinoptilolite (G-Pur®) Microchitosan Bamboo extract	150 mg 100 mg 100 mg 100 mg 100 mg 50 mg

All information is exclusively aimed at and released to an audience of health care professionals.

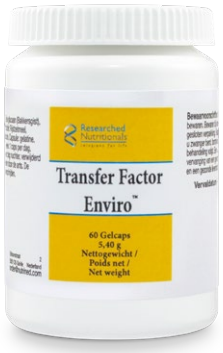
Transfer Factor Enviro™



indication	Specific Transfer Factors Targets specific pathogens **Immune support = Multimessenger + Specific Transfer Factors**	
dosage	1 cap per day during the first week then take 2 caps per day away from food	
packaging	60 gelcaps per container	
composition (amount per 2 gelcaps)	Inositol (Rice bran) Beta Glucan (Baker's yeast) Colostrum (Transfer Factors - pure amino acid sequences)	261 mg

Please find our referenced version on the professional section of our website.
All information is exclusively aimed at and released to an audience of health care professionals.

Core Minerals™

indication	Balanced mineral complex without iron: restorage of minerals during chelation therapy	
dosage	1 x 4 caps per day, 12 hours after chelation	
packaging	120 vegecaps per container	
composition (amount per 4 vegecaps)	Calcium (as Calcium citrate + malate)	300 mg
	Magnesium (as Magnesium glycinate)	300 mg
	Potassium (as Potassium citrate)	99 mg
	Zinc (as Zinc picolinate)	15 mg
	Copper (as Copper glycinate)	2 mg
	Manganese (as Manganese glycinate)	2 mg
	Boron (as Boron picolinate)	2 mg
	Chromium (as Chromium polynicotinate)	200 µg
	Iodine	150 µg
	Selenium (as Selenium citrate)	100 µg
	Molybdenum (as Molybdenum picolinate)	100 µg
	Vanadium (as Vanadylsufate)	100 µg
	Vitamin D3 (as Cholecalciferol)	5 µg

Please find our referenced version on the professional section of our website.
All information is exclusively aimed at and released to an audience of health care professionals.

Mold and Mycotoxins

Fungi are a large group of pathogens with two subgroups: yeast are single cell organisms, molds aremulticellular organisms. Molds reproduce by releasing spores. Some spores produce toxic mycotoxins.

Mold often grows in water damaged buildings. First step in treatment is removal from exposure (STEP 1). To remove the **mycotoxins** from the body, binders are used.

The toxic effects of mycotoxins include gastro-intestinal toxicity, inflammation, neuroinflammationand disruption of the immune response. Every treatment is an individualized interpretation on specific symptoms.

STEP 1 Removal from exposure	
STEP 2 Treatment of impaired intestinal barried induced by mycotoxins: Gut protocol	**Guttae Pepsini** 30 ml Dose: 3 x 10 - 20 drops at the start of the meal and with a small amount of water (swallow immediately) **Gluten DPP IV Complex** 90 vcaps Dose: 3 x 1 caps per day, at the beginning of the meal **Perm Plus Coated tablets** 90 coated tablets Dose: first month: 3 x 2 tablets per day then: 3 x 1 tablet per day, 20 minutes before the meal **CoreBiotic** *The use of soil-based probiotics to remote microbiome and reduce post-prandial raise in endotoxins* 60 vcaps Dose: 1 x 2 caps per day, at least 30 minutes before the meal, for minimum 2 months
STEP 3 Detoxification support & rebuilding Glutathione levels	**Broccoraphanin Nrf2 Support** 100 vcaps Dose: 1 caps per day **Tri-Fortify Watermelon or Orange** 236 ml Dose: 1 teaspoon/day, separated from meals

NUTRINED

STEP 4
Immune support & reduce inflammation

Increasing NK Cell activity & support to the Regulatory T Cells

Multimessenger
90 caps
Dose: 1 x 3 caps per day, just before breakfast

Specific activity targeting antigens

Transfer Factor Enviro
60 caps
Dose: 2 caps before sleep

CytoQuel
90 vcaps
Dose: 3 x 1 caps per day during or after meals

STEP 5
Reducing mycotoxin load in the body with binders.

Binders are not systemically absorbed.

Constipation occurs but binders rarely cause more severe symptoms.

In a general way Binders should be taken separated from food, nutrition and drugs.
Reducing mycotoxin load in the body with binders… etc.
Combine binders based on general recommendations – see table

Carbon Black 400 mg (activated charcoal – certified grade)
200 vcaps
Dose: 1-5 caps per day

Cholestyramine CSM Pure without additives
200 g powder
Dose: 2 to 4 x per day, max 4 g, dissolved in water or juice
1 hour before or 2 hours after meal or medication
Go slow with the use of binders in hypersensitive patients
Start by 1 x 1 gram – 1 x 2 grams, slowly increase when tolerated

Chlorella Glass grown 250 mg
200 vcaps
Dose: Start slowly with 1 cap per day and gradually build up the daily dose
45-60 minutes prior to food

Mycopul
30 caps
Dose: 1 cap per day
1 hour before or 2 hours after meal

PectaSol-C
454 g powder
Dose: 1 - 3 scoops per day in water or juice

Mycotoxins and their binders

Ochratoxin A	Cholestyramine (first choice) Activated charcoal – certified grade Humic Acid Saccharomyces boulardii
Aflatoxins	Cholestyramine without additives Activated charcoal – certified grade Chlorella glass grown PectaSol-C
Trichotecenes	Cholestyramine without additives Activated charcoal – certified grade Chlorella glass grown
Zearalanone	Saccharomyces boulardii PectaSol-C Cholestyramine without additives
Gliotoxin	PectaSol-C
Fumonisins	Cholestyramine without additives Activated charcoal – certified grade
Deoxynavenol	Cholestyramine without additives Activated charcoal – certified grade

Further supportive measures depending on individual manifestations	Protocol Inflammation (page 17) Protocol Neuroinflammation (page 21) Protocol Oxidative stress (page 26)
